

Product feature

Utilizes a CREE XML-V5 LED
Maximum output of up to 520 lumens.
Integrated "Precision Digital Optics Technology" provides extreme reflector performance.
The longest distance 100 meters and longest duration time 90 hours.
Innovative single button offers access to five brightness levels and eight special modes
Integrated power indicator light displays remaining battery power(patented)
Charging module with a micro USB port charges Li-ion batteries rapidly.
Head have the stainless steel protection ring to protect the core component from damage,also can be used in emergency SOS.
Constructed from aero grade aluminum alloy with HAIII military grade hard-anodized finish
Waterproof in accordance to IPX-8(two meters submersible)
Impact resistant to 1.5 meters.
Tail stand capability

SIZE

length : 125mm
Head dia : 26mm
Tail dia : 21.5mm

Parts

High quality flashlight cover,clip,hand line
high quality USB charging line, standby gum cap
Standby O-ring

Weight

85.6g (exclude the battery)

Selection of battery

	Size specification	Standard voltage	Available or not
14500 Li-ion charging battery	14500	3.7V	(If available and charging)

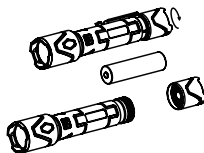

Note: When charging the battery, just can be charged with 14500 Li-ion battery, others can't be charged.

Brightness & time

I331PRO-14500 RECON MAN						
Output	Runtime	Turble	High	Med	Low	Moon
OUTPUT	520 lumens	180 lumens	70 lumens	17 lumens	1 lumens	1 lumens
RUNTIME	65mins	2h	5.2h	20.3h	90h	90h
Impact Resistant	1.5 meters					
Waterproof	IPX8 (under water 2 meters)					

Use flashlight

Put the battery into flashlight.
According to below sketch map to put one 14500 battery :

Note: Please install the battery according to the positive pole towards the lamp holder, counter assemble the battery the flashlight can't work.

Long time open/turn off the flashlight

Open the flashlight press the tail button switch when you hear the sound of "Da " to loose your grip,the flashlight open.

Turn off the flashlight press the tail button switch again when you hear the sound of "Da " to loose your grip,the flashlight turn off.

Enter to super brightness grade directly

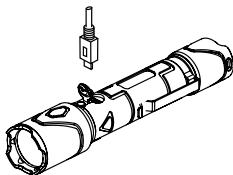

In opening the flashlight status, light press the button and keep more than 1 second, flashlight will skip other gears and enter to super brightness output status.
Note: when the flashlight open super brightness more than 20 minutes it will reduce the brightness automatically output to avoid the high flashlight temperature, and protect the battery lifetime effectively; if user wants to open super brightness again, just to light press the switch more than 1 second then can start the super brightness gears.(520 lumens)

Special gears(Strobe/SOS function)

When the flashlight is on open status, double-click quickly will start Strobe function, continue to double press will start SOS function. If user wants to quit the special gears, just need to press the shift gears button again , flashlight will quit the special gears.

Charging

The product has its own smart USB charging line. As picture shown, then end of USB charging line connect with body charging jack field, the other end plug in USB charging equipment(USB charger, computer or other USB charger equipment), and open the tail switch of flashlight then can charge. To charge one 14500 Li-ion battery ,the charging time may be 3 hours.

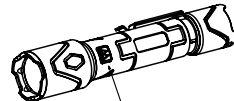

Note:

- 1.This product only to be charged with single 14500 Li-ion battery
- 2.When charging, you must open the tail switch of flashlight then you can charge.
- 3.You can normally charge when you press the tail switch after you insert USB charging,the blue indicator in the side button will blink all the time if you don't press the tail switch , the indicator in the side button is red and long bright which shows it's normally charging.

I331 PRO Instruction Manual
