EISA AWARD CITATION

CONFIDENTIAL/EMBARGOED UNTIL AUGUST 24th, 2026

OFFICIAL EISA Award citation for:

EISA In-ear Headphones 2026-2027

Samsung Galaxy Buds4 Pro

Employing a two-way speaker with individual amplifiers dedicated to the woofer and tweeter, Samsung's IP57-rated Galaxy Buds4 Pro yields clean, musical detail and limits distortion across the frequency range. Complementing this acoustic hardware, Samsung's proprietary Seamless Codec, via Bluetooth 6.1, enables 96kHz/24-bit Hi-Res audio playback when paired with a compatible Galaxy device. For noise isolation, the integrated Enhanced Adaptive ANC system uses real-time processing to attenuate noise and automatically tailor the output to the wearer's ear shape. This is further elevated by AI-powered Adaptive Noise Control, which constantly analyses your surroundings to optimize noise levels, and Siren Detect, which instantly allows emergency alerts to penetrate the ANC for safety. Meanwhile, advanced Sensor Fusion technology combines a dedicated Voice Pickup Unit (VPU) with DNN-powered noise reduction to ensure exceptionally clear calls. Ergonomically designed and supplied with three ear tip sizes for a secure fit, the Galaxy Buds4 Pro is a well-rounded choice for everyday high-fidelity listening.
